

Macroeconomic Context

Angolan oil production for the month of July saw a considerable increase of approximately 4.75% compared to the previous month, this increase was the result of the operational efficiency of the installations which was 91% against 89%, the price per barrel was 83 USD, which meant an increase due to the fall in global oil stock and geopolitical tensions in the Middle East.

Inflation

The inflation rate in Angola in July maintained its upward trend, reaching 31%. These levels impact the purchasing power of the population and continue to require government measures to contain the widespread increase in prices.

Politics and Money Market

In July 2024, the BNA continued its tightening monetary policy, maintaining the BNA rate at 19.5%, the interest rate on the permanent liquidity provision facility at 20.5% and the interest rate on the liquidity absorption facility at 18.5%. According to the BNA, these measures aim to slow down the pace of price growth in the economy.

The Fund's behavior was driven by portfolio movements and direct impacts on the appreciation of the Fund's portfolio assets.

	July (effective)	July (annualized)	July (Year To Date)
Performance	0,95%	11,76%	11,35%

Returns and Benchmark

Portfolio Composition

Evolution of the Value of Participating Units (AOA)

The reported returns represent past data and do not constitute a guarantee of future returns. The disclosed returns would only be obtained if the investment were made and maintained throughout the reference period. For the purpose of calculating returns, subscription, redemption and transfer fees are not taken into account, when applicable, being net of all other fees and charges. The Synthetic Risk and Reward Indicator measures the risk of price variation of the Fund's units, based on the volatility verified in the last 5 years and classifies the Fund's risk level between 1 (minimum risk) and 6 (maximum risk). Lower risk potentially implies lower reward and higher risk potentially implies higher reward. Investment in funds may imply the loss of invested capital if the fund does not have guaranteed capital. Benchmark – the criteria used are the average rate for Time Deposits of up to 90 days and between 90 and 181 days (Effective rate, net of taxes – IAC), available for consultation at the National Bank of Angola. The TxR YTD (Year to Date) is the rate of return (annualized) calculated from the first day of the annual calendar to the moment to which it refers; the TxR 12M is the rate of return for the last 12 months of the Fund (tax free, as defined in the Fiscal Regime of UCIs). This information does not exempt you from reading the simplified and complete Prospectus, available at www.hemeracapitalpartners.com, and on the respective distributor websites (Banco Millennium Atlântico), before making an investment decision. For any additional information, contact us at the telephone number (+244) 222 711 643, from Monday to Friday from 9:00 am to 6:00 pm. Fund managed by SG Hemera Capital Partners – SGOIC, S.A., registered with the CMC as a Management Company of Collective Investment Organisms authorized under No. 002/SGOIC/CMC/07-2019.
